Md.Atikur Rahaman

Full Stack Developer

atikurrahaman0305@gmail.com +8801723383575 Linkedin Github Portfolio

Dhaka,Bangladesh

Skills

Programming Languages: JavaScript, TypeScript, Python, C/C++, Java
Frameworks & Libraries: Next.js, React.js, Node.js, Express.js, Mongoose, Prisma ORM, Django
Database: MySQL, PostgreSQL, MongoDB
Tools: Git, GitHub, Vercel, AWS, Postman, Figma

Work Experience

Full Stack Developer (Remote) | Freelance 11/2023 – Present

- Architected scalable web apps with clean UI/UX using React, Node, Express, and Tailwind.
- Partnered directly with clients to gather requirements, manage expectations, and deploy scalable solutions.

Projects

1. ScholarFlow (AI-Powered Research Paper Collaboration Hub)
AI-powered SaaS platform for uploading, organizing, searching, and collaborating on research papers in shared workspaces.

- End-to-end paper pipeline: PDF upload + metadata extraction + fast advanced search for large libraries.
- Team collaboration: shared collections/workspaces with role-based access and secure authentication (OAuth + JWT).
- Production-grade reliability: standardized API errors, rate limiting, health checks, and performance monitoring (X-Response-Time).

Technologies: Next.js, TypeScript, Redux, Zod, ShadCN UI, Express.js, PostgreSQL, Prisma, AWS S3, pgvector.

Live Link *Github Link*

2. VocabPrep (Vocabulary Learning Web App)
Modern vocabulary learning app with interactive practice sessions and progress tracking to improve retention.

- Interactive learning + practice flow with structured sessions to reinforce new words.
- Progress tracking dashboard to monitor mastery and learning consistency.
- Responsive UI with smooth UX patterns for quick daily practice.

Technologies: Next.js 15, TypeScript, Tailwind CSS, ShadCN UI, Redux Toolkit Query, Express.js, Mongoose.

Live Link *Github Link*

3. Loan Approve Predictor
Machine learning model that predicts loan approval outcomes using applicant and loan features.

- Data preprocessing + feature engineering pipeline to improve model signal quality.
- Trained and evaluated predictive models with performance comparison (metrics-driven selection).
- Notebook-based experimentation for reproducible analysis and iteration.

Technologies: Python, Jupyter Notebook, pandas, NumPy, scikit-learn.

Education

B.Sc. in Computer Science and Engineering 2023 – present
United International University | Expected Graduation: 2027

- Current CGPA: 3.81/4.00

Awards:

- **1st Runner-Up**, System Analysis & Design Lab Project, **UIU CSE Project Show** (Fall 2025).
- **1st Runner-Up**, Database Management Systems Lab Project, **UIU CSE Project Show** (Summer 2025).
